VI. TEACHING AND LEARNING ACTIVITIES (TLAs)

TLA1. Situation: Interactive lectures

- Lectures: basic knowledge of auditing is presented with PowerPoint slides.
- In-class exercises: basic concepts and techniques are illustrated using examples. Students work through in-class exercises along with the lecturer. These exercises help students follow the lectures closely and actively.
- In-class discussions: students are encouraged to raise questions, participate in discussions and share opinions with their peers. These discussions encourage students to think more for certain arguable topics.
- Case analysis and synthesis: Students are required to form groups to analyze and present small cases. The assigned cases have a broad coverage, including applications of auditing knowledge to real-life situations, discussions of controversial issues in client acceptance, discussions of ethical and practical issues. These practices help students improve critical thinking abilities and research skills.

Major focus: ILOs 1, 2, 3 and 4.

TLA2. Situation: Tutorials

Practice questions and selective assignments are covered.

- Weekly tutorial assignments: students are required to complete assigned homework that reflects concepts and techniques learned before each tutorial session on an individual basis.
- In-class interactive activities: students are required to interact with the tutorial instructor, and participate in the in-class exercises and discussions actively.

Major focus: ILOs 1, 2, 3 and 4.

TLA3. Situation: Case analysis and synthesis and outside-classroom activities

- Group discussions: students are divided into groups to complete *a cases analysis* and *a case synthesis* in the small group lecture. Each group of students will be assigned **a case** to analyze and present, and **another case** to write a case synthesis to assess their abilities to apply the auditing knowledge they acquired to real life practical scenarios. Students' participation and discussions (as a group) are also required during the case presentation session. Once the case is assigned, each group should work as a team and contribute jointly to discuss and analyze the case, assign responsibility for the case and present the case in class.
- Lecturer consultations: the lecturer provides 6 hours of consultation weekly to address students' questions and doubts related to the course.

Major focus: ILOs 2, 3 and 4.

AT1. Attendance and Assignments (12%)

Students are expected to attend and participate actively in lectures and tutorials. Written assignments and exercises will be assigned for each topic to assess the students' ability to comprehend the concepts discussed during lectures. Students are also required to attempt selected assignments before commencement of the tutorials. Quietly sitting in the tutorials does not count, but of course absenteeism from class will negatively affect the

performance. Part of the coursework assessment will be allocated to individual performance in the class discussions of the homework assignments. Participation and assignments are evaluated per student by the tutorial instructor. The objective of the tutorials is to help students digest and apply the knowledge they have learned from the classes.
