COURSE DESCRIPTION

Global warming and environmental concerns have become urgent issues and financial solutions are being sought after. Green finance is designed to support sustainable, climate friendly growth. Institutional investors, corporate managers and government organizations are actively participating in this area. Many impact funds are being set up every year. This course introduces the recent development in the financial market on green finance such as green bonds. Impact investing such as activism will be analyzed. The rising importance and implementation of environmental, social and governance (ESG) for investment will be studied. Other related topics are accounting, certification, and reporting of green projects.

COURSE OBJECTIVES
