The School of Economics and Business was founded in 1987 in the hope of becoming a quality institution of reference. Our School pioneered in bilingual programs and today we offer 8 different programs, 5 of which are bilingual, and our 133 partner universities from all over the world help make this possible. A strong international perspective, combined with a humanistic educational approach and the orientation of each and every student, allows the cultivation of “economists with a human face”, as our first Dean once said. At our School, student-centered approach and student participation and involvement are essential components aimed at fulfilling our mission.
